

Shavlik Security Suite

Government Edition

Increase the level of security while also reducing costs for maintaining systems and software applications.

The Common Criteria certified Shavlik Security Suite Government Edition is the ideal solution for government agencies and global businesses. Use it to automate IT management operations including asset discovery and inventory, patch management, antivirus + antispyware protection, power management, compliance auditing, and configuration management to eliminate policy drift and ensure compliance with critical agency directives.

The Common Criteria certified Shavlik Security Suite Government Edition helps customers achieve compliance with Information Assurance Vulnerability (IAVA) alerts, bulletins, and technical advisories and IAVA-mandated remediation deadlines. This capability provides US Department of Defense agencies with the ability to simplify and automate their operational processes for reporting their patch compliance with the Department of Defense's IAVA policies.

The Shavlik IAVA Reporter works in tandem with Shavlik NetChk Protect to provide:

- ▶ Direct correlation of DoD-created IAVA numbers to Microsoft QNumbers and bulletin numbers
- ▶ IAVA-specific reports that aggregate results filtered by selected IAVA patch groups. Reports include deployment percentage by patch, detailed summary, machines Status by patch count, and patch status detail.
- ▶ Automated remediation to better ensure compliance with IAVA-mandated remediation requirements and deadlines
- ▶ Regularly distributed data updates to ensure the latest and most thorough IAVA data coverage available through the Shavlik NetChk Protect application and the Shavlik IAVA Reporter add-on

Increase confidence in security measures

- ▶ Shavlik Security Suite Government Edition supports multiple government certifications and standards including SCAP Validation, FDCC Scanner, IAVA Compliance Reporting
- ▶ Certified for EAL 3+ Common Criteria representing the highest security standards essential for any government requirement
- ▶ Shavlik supports standards implemented by the NSA and NIST as well as the federal government's other security initiatives

"The Shavlik implementation offers one of the cleanest XML specifications for SCAP of all the products I've seen."

DORIAN COUGIAS, FOUNDER AND LEAD ANALYST FOR UNIFIED COMPLIANCE FRAMEWORK

Identify and eliminate network gaps and blind spots

- ▶ Easily identify and track those hard-to-manage systems
- ▶ Discover unknown physical and virtual machines
- ▶ Find software applications you didn't know were installed
- ▶ Keep an accurate accounting of installed software
- ▶ Automatically find and deploy missing patches

Continuously improve your security scorecard

- ▶ Government agencies can quickly and easily demonstrate and maintain their compliance with FDCC through continuous and automated configuration assessments and proactive remediation of systems that drift out of compliance

Improve your security state AND prove compliance to auditors

- ▶ Simplifies and accelerates assessment, remediation and provides proof of compliance with FDCC
- ▶ The Shavlik Security Suite Government Edition helps customers achieve compliance with Information Assurance Vulnerability alerts, bulletins, and technical advisories and IAVA-mandated remediation deadlines

Minimize energy costs, maximize patch coverage

- ▶ Seamless integration of patch management and power management in a unified management console
- ▶ Power off unused machines at the end of the day to maximize energy savings – save up to \$60 per machine per year
- ▶ Wake up machines on the network on-demand or a scheduled basis to receive critical security updates

Shavlik Security Suite

Government Edition

Simplify and Automate the Security of your End Points

- ▶ Integrated antivirus + antispysware providing powerful and certified protection against today's highly complex viruses, trojans, root kits, and malware
- ▶ Simplicity and automation without sacrificing visibility and control
- ▶ Secure and patch all approved software to policies and regulations
- ▶ Automates detection and remediation of critical security patches
- ▶ Patch management and antivirus from the same easy-to-use console

Virtualization Security

- ▶ Provides simplified and automated processes for patching all virtual machines, even those that are offline
- ▶ Ensures that offline virtual images can be in a constant state of readiness to be deployed

Security Configuration Management

- ▶ Establish a security baseline and then proactively enforce that policy through continuous assessment and remediation of security and configuration controls
- ▶ Quickly compares configurations across a network to configurations assessed against a regulatory standard or FDCC requirements
- ▶ Shavlik solutions provide an automated way to scan for, compare, and enforce security configuration settings on your network

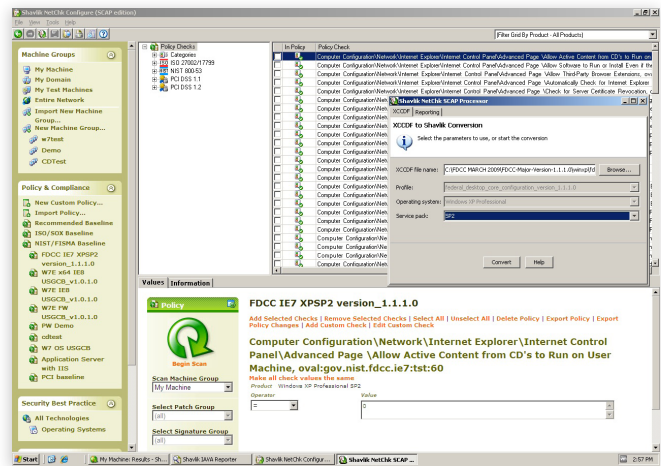

Risk and Compliance Management

- ▶ Makes the latest real-time security status easily accessible
- ▶ Simplifies and automates management of critical system and security configuration settings on your network
- ▶ Provides a data-rich environment to help make real-time decisions on how best to direct security resources to improve enterprise-wide security levels

Support federal government agency mandates

- ▶ Federal Desktop Core Configuration (FDCC)- standardizing the configuration settings on Windows XP and Vista computers to strengthen Federal IT security
- ▶ United States Government Configuration Baseline (USGCB) - create security configuration baselines for Windows 7 and Internet Explorer 8 settings
- ▶ Defense Information Systems Agency – Security Technical Implementation Guide (DISA/STIGs)- requires that systems shall be configured in accordance with DoD approved security configuration guidelines
- ▶ Information Assurance Vulnerability Alert (IAVA)- alert system that issues notifications of computer application software or operating system vulnerabilities

FDCC: First Real World Application for the SCAP Protocol

Shavlik Security Suite Government Edition helps you easily create FDCC compliance reports.
